

Doosan Infracore
Construction Equipment

DX420LC

Engine Power : SAE J1349, net 218kw(293HP)@1,800rpm

Operational Weight : 40,900kg(90,170 lb) - STD.

Bucket capacity(SAE) : 1.44 ~ 2.16m³(1.88 ~ 2.83 cu.yd)

Doosan DX420LC Hydraulic Excavator :

A New Model with Novel Features

DX 420LC

The new DX420LC hydraulic excavator has all the advantages of the previous model, and now offers additional added value to the operator.

The new DX420LC was developed with the concept of "providing optimum value to the end user." In concrete terms, this translates, into :

Increased production and improved fuel economy is attributed to the electronic optimization of the hydraulic system and the new generation DOOSAN engine (Tier 4 / Stage II).

Improved ergonomics, increases comfort and excellent all round visibility ensuring a safe and pleasant working environment.

Improved reliability is achieved through the use of high performance materials combined with new methods of structural stress analysis, and leads to increased component life expectancy, thus reducing running costs.

Reduced maintenance increases the availability and reduces operating costs of the excavator.

HANDLING

The hydraulic excavator's power, durability, ease of servicing and its precise control increase its effectiveness and life expectancy. With the DX420LC, DOOSAN offers an excellent return on investment.

Multi-function color LCD monitor panel

Warning lights

Operation modes

- Mode selection
- Flow rate control
- Auto deceleration
- Display selection

Control panel

With color LCD display

Standard screen

Theft prevention function

Filter/oil information

Operation history

Flow rate control

Contrast control

Choice of operating modes

Working mode

- Digging mode: for general excavation, loading, lifting...
- Trenching mode: swing priority for trench work, canal digging, embankments...

Power mode

- Standard: uses 85% engine power for all work (optimum fuel efficiency)
- Power: uses 100% engine power for heavy work

Control lever

Very precise control of the equipment increases versatility, safety and facilitates tricky operations requiring great precision.

Leveling operations and particularly the movement of suspended loads are made easier and safer.

The control levers have additional electrical buttons for controlling other additional equipment (for example, grabs, crushers, grippers, etc.)

Cellular phone box

12V Power socket

Cigarette lighter

Glass antenna

COMFORT

DX420LC

The work rate of the hydraulic excavator is directly linked to the performance of its operator. DOOSAN designed the DX420LC by putting the operator at the centre of the development goals. The result is significant ergonomic value that improves the efficiency and safety of the operator.

More space, better visibility, air conditioning, a very comfortable seat... These are all elements that ensure that the operator can work for hours and hours in excellent conditions.

Control panel
Correct positioning with clear controls makes the operator's task easier.

The high performance air conditioning provides an air flow which is adjusted and electronically controlled for the conditions. Five operating modes enable even the most demanding operator to be satisfied.

Rear Camera

MP3/CD Player (Optional)

Audio Button
Audio Button has been positioned in a way that the driver can turn on/off the radio, control the volume, and select a channel conveniently.

Air suspension seat (Opt.)

Equipped with various functions of adjustment forth and back and, and lumbar support, it reduces the vibration of equipment transmitted during work in an effective way. Also for considering winter working environment, Seat warmer functions equipped.

Appropriate storage spaces show the attention given to the operator.

Comfortable 2-stage sliding seat

Control stand (Telescopic Function)

PERFORMANCE

The performance of the DX420LC has a direct effect on its productivity. Its new "Common Rail" engine and new e-EPOS controlled hydraulic system have combined to create an unbeatable hydraulic excavator, with a cost/performance ratio that makes the DX420LC even more appealing.

"COMMON RAIL" DOOSAN DV11 ENGINE

At the heart of the hydraulic excavator is the new "Common Rail" DOOSAN DV11 engine. It is combined with the new e-EPOS electronic control system, for optimum power and fuel saving.

The new engine produces 293 hp(218 kw/297 PS) at only 1,800 rpm, and more torque, due to its careful design combined with the use of common rail injection and 4 valves per cylinder. These features help optimize combustion and minimize pollution through reduced Nox & particulate emissions.

Increased torque allows efficient use of the power of the hydraulic system.

- Faster working cycles increase productivity.
- Increased torque means the excavator is able to move more easily.
- Energy efficiency reduces fuel consumption.

DOOSAN infracore is aware of the importance of protecting the environment. Ecology was uppermost in the minds of the research workers right from the start of the design of the new machines. The new challenge for the engineers is to combine the protection of nature with equipment performance and to this end DOOSAN has been investing heavily.

The new DOOSAN engine respects and protects the environment, limiting all types of toxic emissions.

Hydraulic Pump

The Main pump has a capacity of 2x315 /min reducing cycle time while a high capacity gear pump improves pilot line efficiency.

Swing drive

Shocks during rotation are minimized, while increased torque is available to ensure rapid cycles.

EXCAVATOR CONTROL

New e-EPOS system (Electronic Power Optimizing System)

The brains of the hydraulic excavator, the e-EPOS, have been improved and now can electronically link to the engine's ECU (Electronic Control Unit), through a CAN (Controller Area Network) communication link, enabling a continuous exchange of information between the engine and the hydraulic system. These units are now perfectly synchronised.

The advantages of the new e-EPOS impact at several levels, Ease of operation and user-friendliness:

- The availability of a power mode and a normal operating mode guarantee maximum efficiency under all conditions.
- Electronic control of fuel consumption optimizes efficiency.
- The automatic deceleration mode enables fuel saving.
- Regulation and precise control of the flow rate required by the equipment are available as standard.
- A self-diagnosis function enables technical problems to be resolved quickly and efficiently.
- An operational memory provides a graphic display of the status of the machine.
- Maintenance and oil change intervals can be displayed.

RELIABILITY

The reliability of an item of plant contributes to its overall lifetime operating costs. DOOSAN uses computer-assisted design techniques, highly durable materials and structures then test these under extreme conditions.

Durability of materials and longevity of structures are our first priorities.

Strengthened Boom

The shape of the boom has been optimized by finite elements design, allowing uniform load distribution throughout the structure. This combined with increased material thickness means improved durability and reliability by limiting element fatigue.

Arm Assembly

In the arm assembly greater strength has been gained by using cast elements and reinforcement around the bosses to give it an increased lifetime.

X-chassis

The X-chassis frame section has been designed using finite element and 3-dimensional computer simulation, to ensure greater durability and optimum structural integrity. The swing gear is solid and stable.

D-type Frame

The D-type frame design adds strength and minimizes distortion due to shocks.

Bucket

Highly wear-resistant materials are used for the most susceptible elements such as the blades, teeth, rear and lateral reinforcement plates and corners of the bucket.

Bushing

A highly lubricated metal is used for the boom pivot in order to increase the lifetime and extend the greasing intervals to 250 hours. A rolled bushing with very fine grooves has been added to the arm bucket pivot; so greasing is only required every 50 hours.

Ultra-hard wear-resistant disc

New materials have been used in order to increase the wear resistance and to increase the service intervals. The longevity is greatly increased by the addition of wear plates on the inside and outside of the bucket lugs.

Integrated Track Spring and Idler
The track spring and the idler have been joined directly to achieve high durability and improved maintenance convenience.

Tracks
The chain is composed of self-lubricating sealed links isolated from all external contamination. The tracks are locked by mechanically bolted pins.

Polymer shim
A polymer shim is added to the bucket pivot to promote extended pin and bushing life.

Pump coupling
A polymer material is used to produce the coupling between the pump and engine. This material has a long life and reduces noise and vibration levels.

MAINTENANCE

Short maintenance operations at long intervals increase the availability of the equipment on site. DOOSAN has developed the DX420LC with a view to high profitability for the user.

Maintenance of optimum cooling status

During operation, forward rotations help maintain optimum cooling, while a conveniently located switch allows the operator to reverse the rotation of the fan to help remove dust and foreign substances from the cooler, contributing to the maintenance of optimum cooling at all times.

Easy maintenance

Access to the various radiators and coolers is very easy, making cleaning easier. Access to the various parts of the engine is from the top and via side panels.

Hydraulic oil return filter

The protection of the hydraulic system is more effective, using glass fiber filter technology in the main oil return filter. This means that with more than 99.5% of foreign particles filtered out, the oil change interval is increased.

Air cleaner

The large capacity forced air cleaner removes over 99% of airborne particles, reducing the risk of engine contamination and making the cleaning and cartridge change intervals greater.

Fuel filter

High efficiency fuel filtration is attained by the use of multiple filters, including a fuel pre-filter fitted with a water separator that removes most moisture from the fuel.

PC Monitoring (DMS)

A PC monitoring function enables connection to the e-EPOS system, allowing various parameters to be checked during maintenance, such as pump pressures, engine rotation speed, etc. and these can be stored and printed for subsequent analysis.

Convenient Fuse Box

The fuse box is conveniently located in a section of the storage compartment behind the operator's seat providing a clean environment and easy access.

Engine oil filter

The engine oil filter offers a high level of filtration allowing the oil change interval to be increased to 500 hours. It is easy to access and is positioned to avoid contaminating the surrounding environment.

Centralized grease inlets for easy maintenance

The arm grease inlets are grouped for easy access.

DX420LC

* ENGINE

• Model

Doosan DV11
 “Common Rail” engine with direct fuel injection and electronic control, 4 valves per cylinder, vertical injectors, water cooled, turbo charged with air to air intercooler. The emission levels are well below the values required for phase III

• Number of cylinders

6

• Nominal flywheel power

218 kW(293 HP) @ 1,800 rpm (SAE J1349, net)

• Max torque

140 kgf.m(1,373 Nm) at 1,300 rpm

• Piston displacement

10,964 cc (669 cu.in)

• Bore & stroke

128 mm x 142 mm (5.0”X5.6”)

• Starter

24 V / 7 kW

• Batteries

2 x 12 V / 150 Ah

• Air cleaner

Double element and pre-filtered Turbo with auto dust evacuation.

* HYDRAULIC SYSTEM

The heart of the system is the e-EPOS (Electronic Power Optimizing System). It allows the efficiency of the system to be optimized for all working conditions and minimizes fuel consumption.

The new e-EPOS is connected to the engine electronic control via a data transfer link to harmonize the operation of the engine and hydraulics.

- The hydraulic system enables independent or combined operations.
- Two travel speeds offer either increased torque or high speed tracking.
- Cross-sensing pump system for fuel savings.
- Auto deceleration system.
- Two operating modes, two power modes.
- Button control of flow in auxiliary equipment circuits.
- Computer-aided pump power control.

• Main pumps

2 variable displacement axial piston pumps

max flow: 2 x 315 /min (2X83.2US gpm, 2X69.3lmp gpm)

• Pilot pump

Gear pump - max flow: 22 /min (5.8US gpm, 4.8lmp gpm)

• Maximum system pressure

Boom/arm/Bucket:

Normal mode: 320 kgf/cm²(314 bar)

Power mode: 350 kgf/cm²(343 bar)

Travel: 320 kgf/cm²(314 bar)

Swing: 270 kgf/cm²(265 bar)

* WEIGHT

Boom 6,700 mm (22') • Arm 3,250 mm (10'8") • Bucket SAE 1.90 m³ (2.49yd³)

	Shoe width	Operating weight	Ground pressure (kgf/cm ²)
Triple Grouser	(Std)600 mm (2')	40,900 kg (90,170lb)	0.74 kgf/cm ² (73kpa, 10.5psi)
	750 mm(2'6")	41,600 kg (91,710lb)	0.61 kgf/cm ² (60kpa, 8.7psi)
	800 mm(2'8")	41,900 kg (92.370lb)	0.57 kgf/cm ² (56kpa, 8.1psi)
	900 mm(2'11")	42,400 kg (93,480lb)	0.50 kgf/cm ² (49kpa, 7.1psi)
Double Grouser	(opt)600 mm (2')	41,700 kg (91,930lb)	0.76 kgf/cm ² (75kpa, 10.8psi)

* HYDRAULIC CYLINDERS

The piston rods and cylinder bodies are made of high-strength steel. A shock absorbing mechanism is fitted in all cylinders to ensure shock-free operation and extend piston life.

Cylinders	Quantity	Bore x Rod diameter x stroke
Boom	2	165 X 115 X 1,460mm(6.5"X 4.5" X 4'9")
Arm	1	180 X 120 X 1,820mm(7.1" X 4.7" X 6')
Bucket	1	160 X 110 X 1,320mm(6.3" X 4.3" X 4'4")

* UNDERCARRIAGE

Chassis are of very robust construction, all welded structures are designed to limit stresses.

High-quality material used for durability.

Lateral chassis welded and rigidly attached to the undercarriage. Track rollers lubricated for life, idlers and sprockets fitted with floating seals.

Tracks shoes made of induction-hardened alloy with triple grousers.

Heat-treated connecting pins.

Hydraulic track adjuster with shock-absorbing tension mechanism.

• Number of rollers and track shoes per side

Upper rollers: 2 (standard shoes)

Lower rollers: 9

Shoes: 50

Total length of track: 5,200mm (17'7")

* ENVIRONMENT

Noise levels comply with environmental regulations (dynamic values).

• Sound level guarantee

104 dB(A) (2000/14/EC)

• Cab sound level

73 dB(A) (ISO 6396)

* SWING MECHANISM

- An axial piston motor with two-stage planetary reduction gear is used for the swing.
- Increased swing torque reduces swing time.
- Internal induction-hardened gear.
- Internal gear and pinion immersed in lubricant bath.
- The swing brake for parking is activated by spring and released hydraulically.

Swing speed: 0 to 9.2 rpm

* DRIVE

Each track is driven by an independent axial piston motor through a planetary reduction gearbox.

Two levers with control pedals guarantee smooth travel with counter-rotation on demand.

• Travel speed (fast/slow)

5.3/3.1km/h (3.3/1.9mph)

• Maximum traction force

17,200 / 32,500 kgf (37,919/71,649lbf)

• Maximum grade

35° / 70%

* REFILL CAPACITIES

• Fuel tank

550 (145US gal, 121lmp gal)

• Cooling system (Radiator capacity)

40 (10.6US gal, 8.8lmp gal)

• Engine oil

44 (11.6US gal, 9.7lmp gal)

• Swing drive

6 (1.6US gal, 1.3lmp gal)

• Final drive (each)

11 (2.9US gal, 2.4lmp gal)

• Hydraulic system

420 (110.9US gal, 92.4lmp gal)

• Hydraulic tank

265 (70US gal, 58.3lmp gal)

1. Ratings are based on SAE J1097
2. The load point is a hook located on the back of the bucket.
3. * Rated loads are based on hydraulic capacity.
4. Rated loads do not exceed 87% of hydraulic capacity or 75% of tipping capacity.

STANDARD AND OPTIONAL EQUIPMENT

* STANDARD EQUIPMENT

• Hydraulic system

- Boom and arm flow regeneration
- Boom and arm holding valves
- Swing anti-rebound valves
- Spare ports (valve)
- One-touch power boost

• Cabin & Interior

- Viscous cab mounts
- All weather sound suppressed type cab
- Air conditioner
- Adjustable suspension seat with head rest and adjustable arm rest
- Pull-up type front window and removable lower front window
- Room light
- Intermittent windshield wiper
- Cigarette lighter and ashtray
- Cup holder
- Hot and Cool box
- LCD color monitor panel
- Fuel control dial
- AM/FM radio and cassette player
- Remote radio ON/OFF switch
- 12V spare powers socket
- Serial communication port for laptop PC interface
- Joystick lever with 3 switches
- Sunvisor
- Sun roof

• Safety

- Large handrails and step
- Punched metal anti-slip plates
- Seat belt
- Hydraulic safety lock lever
- Safety glass
- Hammer for emergency escape
- Right and left rearview mirrors
- Travel alarm

• Other

- Double element air cleaner
- Pre-cleaner
- Water separator
- Dust screen for radiator/oil cooler
- Engine overheat prevention system
- Engine restart prevention system
- Self-diagnostic system
- Alternator(24V, 50 amps)
- Electric horn
- Halogen working lights(frame mounted 2, boom mounted 2)
- Hydraulic track adjuster
- Track guards
- Double fuel filter
- Greased and sealed track link

* OPTIONAL EQUIPMENT

Some of these optional equipments may be standard in some markets. Some of these optional equipments cannot be available on some markets. You must check with the local DOOSAN dealer to know about the availability or to release the adaptation following the needs of the applications.

• Safety

- Boom and arm hose rupture protection valve
- Overload warning device
- Cabin Top/Front guard(ISO 10262, FOGS standard)
- Travel & swing alarm
- Rotation beacon

• Cabin & Interior

- Air suspension seat
- MP3/CD player

• Other

- Piping for crusher
- Piping for quick clamp
- Breaker filter
- 750mm/800mm/900mm shoe
- Full track guards
- Lower wiper
- Fuel heater
- Double grouser shoe
